## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Leung, 6,415,353.

Leung, 6,415,353, discloses in Fig. 1 a memory device comprising:

a plurality of DRAM banks 0-63;

data access control circuits 100-163;

as shown in Fig. 10, memory bank controller 2007 generating refresh enable signal

REF[n] to independently control the refresh operation in each memory banks (see lines

3-5, column 3) and preventing all memory banks from enabling simultaneously during

the refresh operation (see lines 46-50, column 3).

### ***Allowable Subject Matter***

3. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

4. Applicant's arguments filed on 12/20/06 have been fully considered and are persuasive. Therefore, the last office action of 10/20/06 has been withdrawn.

Art Unit: 2827

However, in view of Applicant's amendments, the newly discovered prior art of Leung, 6,415,353, and upon further consideration, a new office action has been set forth and made FINAL as above.
